English	Fluent
Arabic	Conversational
Urdu / Hindi	Native

PROFESSIONAL SUMMARY

AI Engineer and Full Stack Developer with experience building production-grade AI chatbots, SaaS platforms, and automation solutions using Python, React, Node.js, OpenAI, Gemini, and AWS. Delivered 20+ client projects across healthcare, hospitality, and education sectors.

WORK EXPERIENCE

Founder & Lead AI Developer

2024 – Present

Frack AI Creations

Remote · USA · UK · AU · EU · MENA · Vietnam

- Built and deployed 20+ AI-powered apps, SaaS platforms, and automation systems for international clients across 10+ countries
- 5-star rated agency — consistent on-time delivery, repeat clients, long-term retainer relationships
- Specialist stack: Claude API, Gemini LLM, WhatsApp bots, VAPI calling agents, Stripe billing, AWS
- Full project lifecycle ownership — discovery, architecture, development, deployment, and client handoff

IT Associate

Jun – Nov 2025

Symantec

On-site

- Provided IT support and systems administration in enterprise cybersecurity environment
- Hands-on experience with enterprise infrastructure, security protocols, and end-user support workflows

CLIENT PROJECTS (PAID DELIVERIES)

01 YoYo CRM — AI-Powered SaaS CRM yoyocrm.io

SaaS Claude API Stripe USA

- Full-stack CRM with WhatsApp QR session integration, multi-account support, automated inbox management
- Stripe monthly subscription billing with plan management, webhooks, and access-gate middleware

02 Maktab Elite — Office Furniture E-Commerce maktabelite.com

E-Commerce Next.js Bilingual AR/EN KSA

- Fully bilingual Arabic/English platform for Saudi market — 90+ products, WhatsApp-first ordering flow
- SEO-optimised pages targeting Jeddah, Riyadh, Dammam, Makkah, and other major KSA cities

03 Fortva — AWS Zero-Knowledge AI Platform fortva.com

AWS Zero-Knowledge Cloud Security AI

- Architected zero-knowledge data storage on AWS — end-to-end privacy by design, no plaintext server access
- Scalable cloud infrastructure, security-first architecture, and high-availability performance

04 Crypto DEX — AI-Powered Decentralised Exchange

Web3 DeFi AI Analytics

- Full-featured DEX with AI-assisted trading insights — wallet connect, token swaps, live market data feeds
- AI signal layer for real-time market sentiment analysis and automated trade recommendations
- Integrated live on-chain data feeds and portfolio tracker with wallet authentication

05 AI Crypto Trading Bot — Automated Profit System

Trading Automation AI Signals Vietnam

- AI bot achieving consistent 7/10 profitable trade ratio for client — fully automated 24/7 execution
- Technical indicator stack with AI signal processing for buy/sell decision logic

DEVOPS & CLOUD

AWS EC2 / S3 / Lambda Vercel Render Docker GitHub Actions CI/CD

HOW I WORK

Discovery & Architecture

I start every project by mapping client goals to system architecture — defining API flows, database schema, and AI integration points before a single line of code is written.

Build & Ship Fast

Rapid iterative development with weekly client demos. I prioritise working software over documentation — most projects reach a live MVP within 2–4 weeks from kickoff.

AI-First by Default

Every product I build evaluates where LLMs can replace manual workflows — from automated replies and lead scoring to document parsing and voice agents via VAPI.

Long-Term Partnership

Over 60% of my clients are on long-term retainer arrangements. I provide post-launch support, feature roadmaps, and ongoing model fine-tuning for production systems.
